Dolidze, M. V.

THE EMISSION NEBULA IC443= S40, tr. by P. Kazakov. [1960] 2p. 1 ref. Trans. no. 5069. Order from LC or SLA mi$1.80; ph$1.80 61-15231

Trans. of Astronomicheskiy Tsirkulyar (USSR) 1959, no. 204, p. 13-14.

Spectral observations with a prism camera in the red indicate that matter, in the form of jets and filaments, is flowing away from the nebula or is carried away from it by a stream in two opposite directions. It is difficult to think that the formation (and the luminosity mechanism) of the filaments and jets situated near IC443+S40 and directed from north to south is a result of the effect of radiation, the ejection of gas from the stars, or a collision of nebulosities moving in space.
